Farnham Academy School News

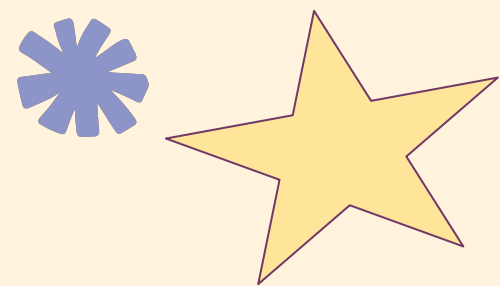

Reception

This week, we continued reading the story Goldilocks and the Three Bears. We sorted pictures, deciding which things were in the story and which were not.

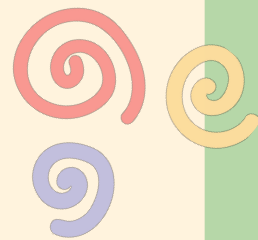

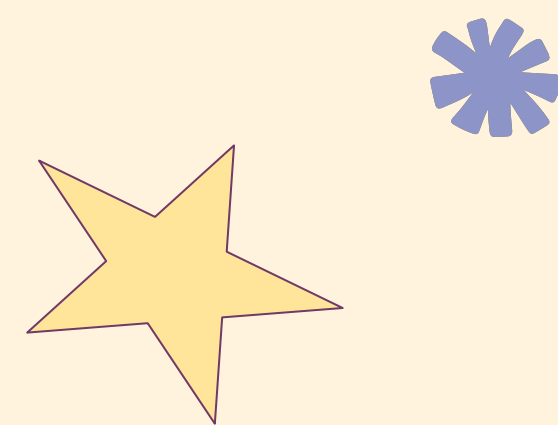

In Understanding the World, we thought about where we live and explored some of the amazing places in Bradford, learning their names, including the Alhambra.

In maths, we helped our counting puppet by carefully counting objects and thinking of strategies to make sure we did not count anything twice.

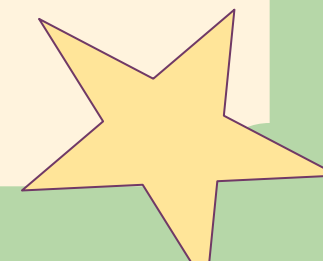

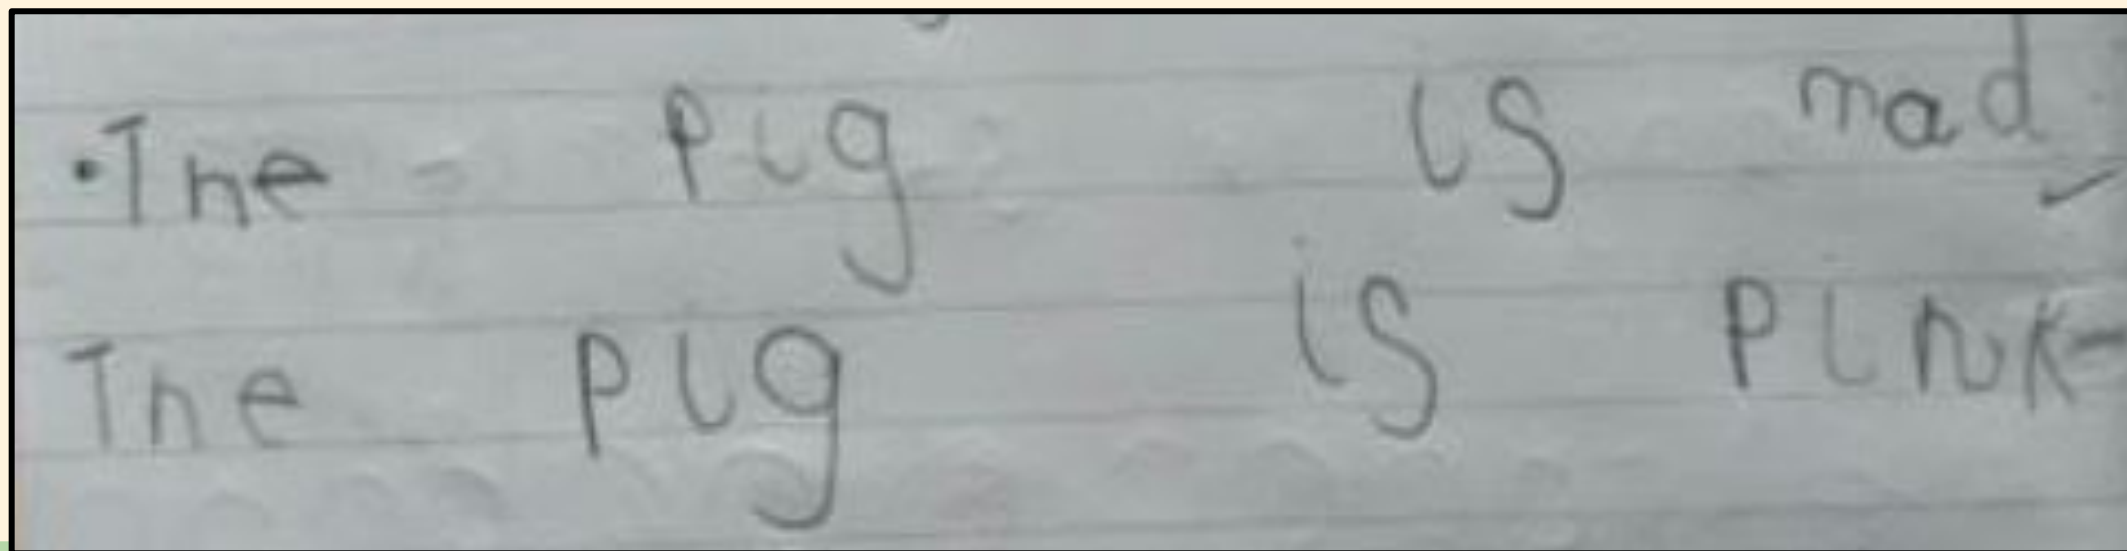

Year 1

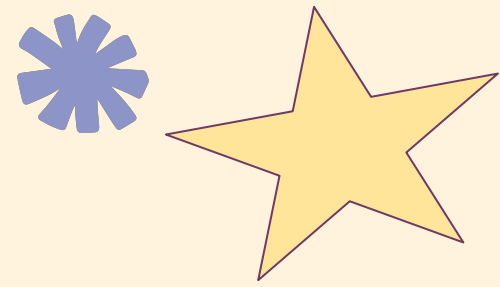

In English we have written sentences to describe the Big Bad Pig. We have concentrated on using phonics to sound out words and using finger spaces.

In maths we have looked at different ways to represent numbers and have made a big effort to form our numbers correctly.

In history, we have learnt what a memory is and talked about some of our favourite memories.

Year 2

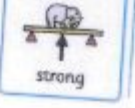

This week, in English we have started our text 'Jack and the Beanstalk.' We have looked at who the characters are in the story.

In maths, we have been working hard to consolidate our understanding of numbers to 20 using tens and ones and counters.

In science, we explored school looking at different objects and the materials they are made from. We then discussed the properties of the materials such as fragile, transparent or rigid.

Year 3

In English we have been looking at common and proper nouns relating to our new book 'Small in the city'.

In maths and place value we have delved into the hundreds column and looked at how the value of a number changes depending on which column it is in.

In science we have had lots of fun finding out about the different names of all the bones in our body!

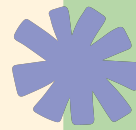

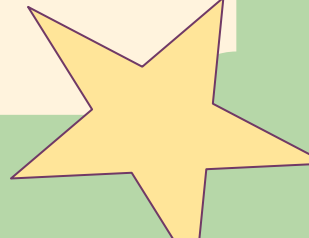

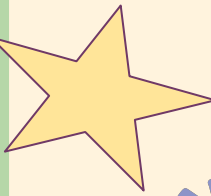

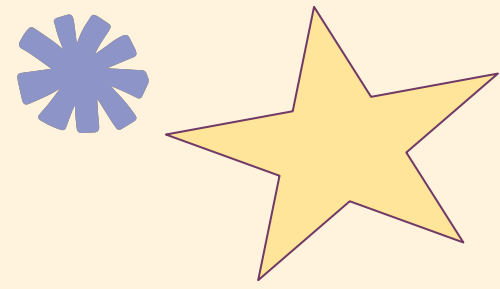

Year 4

Year 4 have learnt about the different types of teeth we have and what they are used for in science. We created models using salt dough.

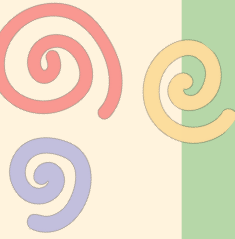

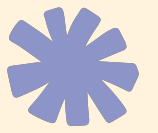

In maths we are looking at 10 and 100 more and less than a number. In writing we have been describing our favourite desserts.

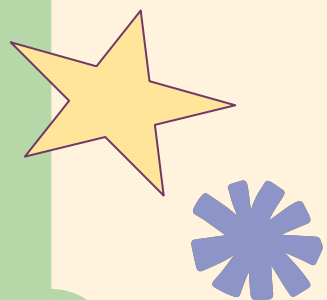

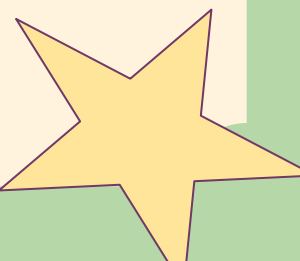

Year 5

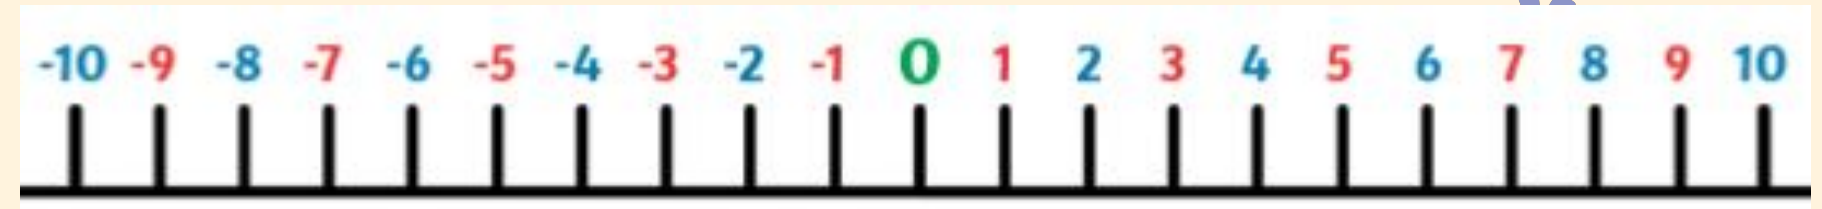

This week, in English we have used fronted adverbials, adjectives and adverbs to create super sentences.

In maths, we have placed counters in place value grids to make numbers up to 1,000,000 and have begun learning about the powers of 10 using Gattegno's place value chart.

In computing, we enjoyed learning about the Mars Rover and how it transmits data back to Earth.

Year 6

In maths this week we have been solving problems that include negative numbers. We have used a number line and we have been able to spot patterns to help us solve problems quickly.

In writing we have continued our work on the book - The Journey. We are now creating our own poem to represent the father's life.

Thank You
