Farnham Academy School News

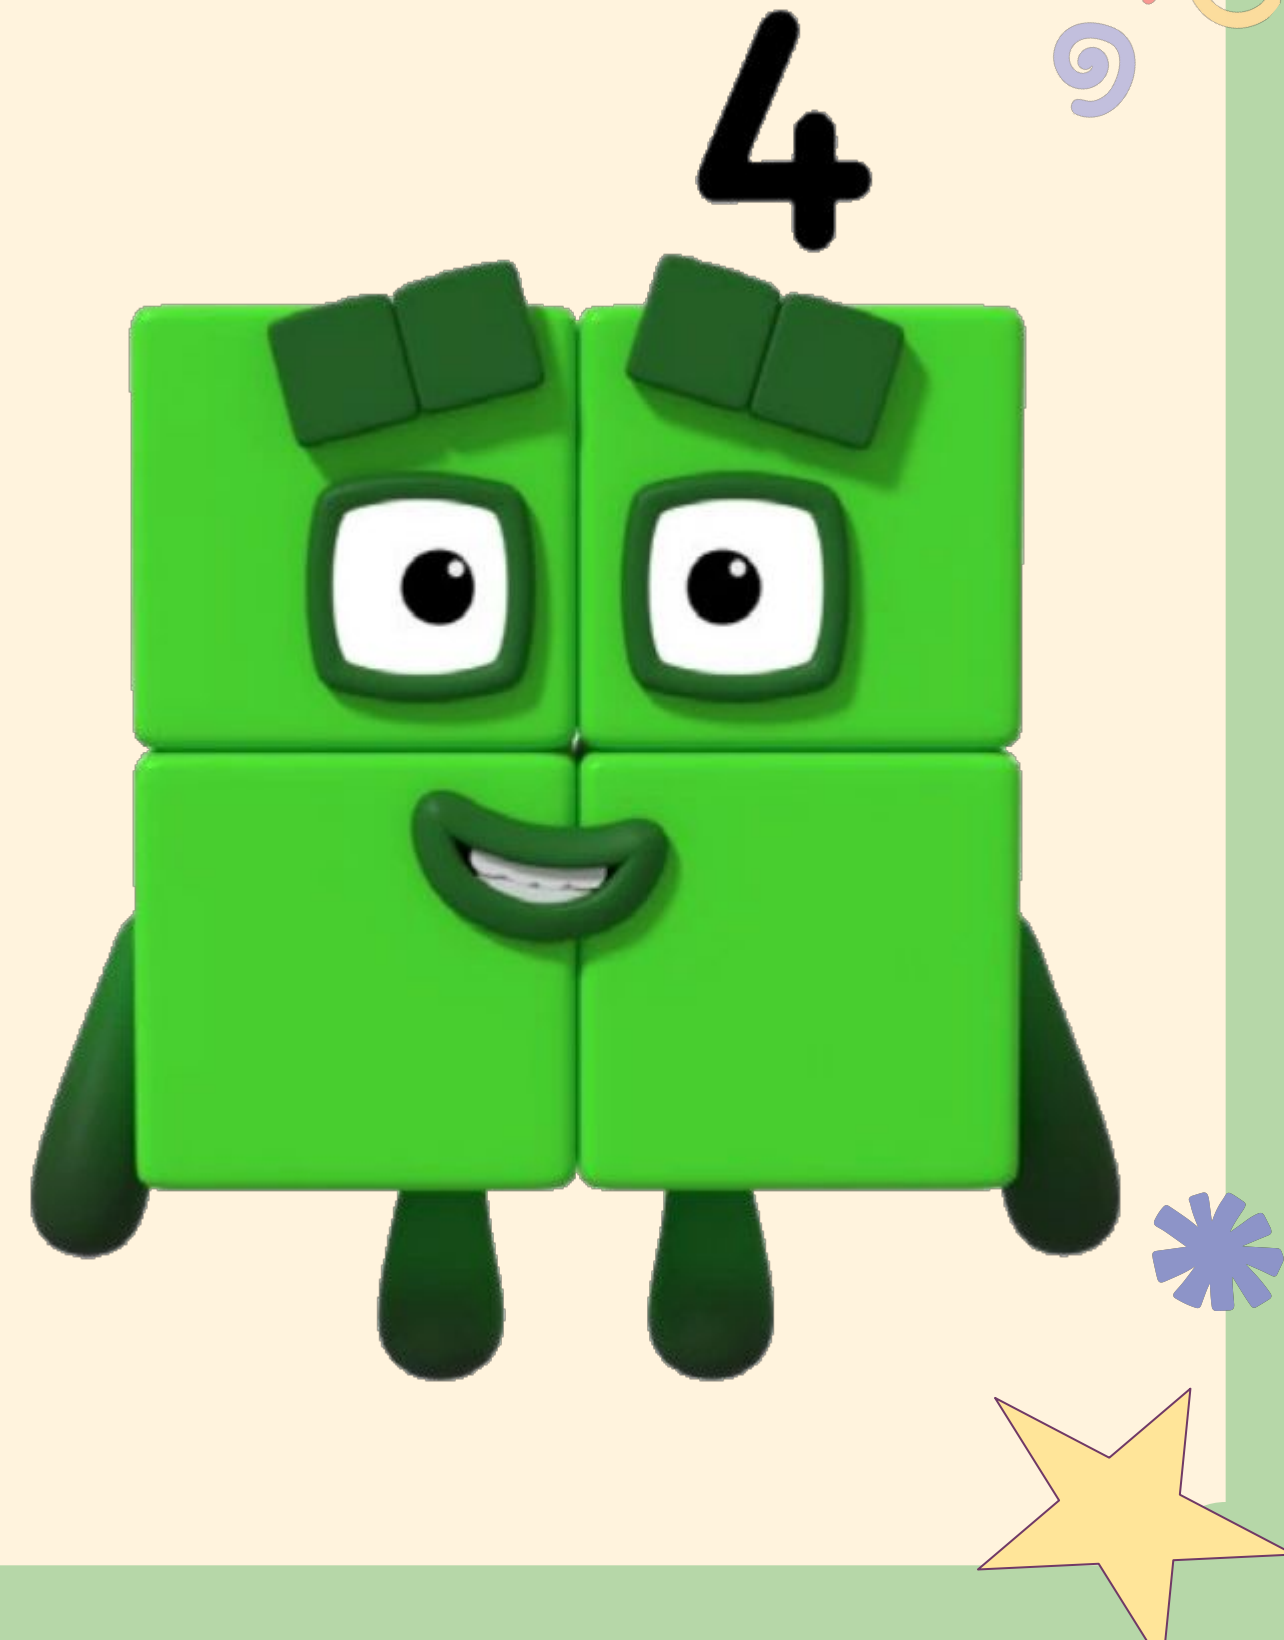

Reception

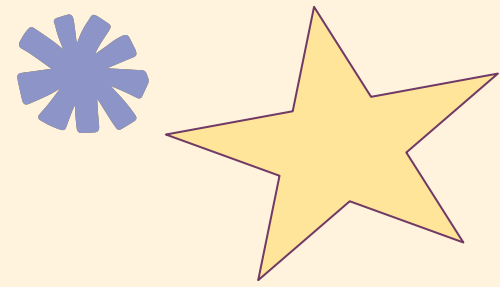

This week, we have continued reading *We're Going on a Bear Hunt*. We talked about what we would like to go on a hunt for and had a go at drawing our ideas.

In PSED, we explored the idea of consequences and thought about how our actions can affect others. We discussed how someone might feel if their tower was knocked over and considered how we can be kind and considerate towards our friends.

In maths, we focused on the number 4 and explored different ways to make 4. We used stamps to create patterns and represented the number 4 in lots of different ways.

We have also continued learning our phonics sounds. We enjoyed taking part in Dough Disco, which helps to strengthen our hands, fingers and wrists and supports us in developing the muscles we need for writing.

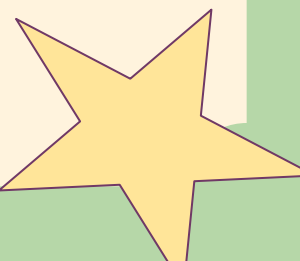

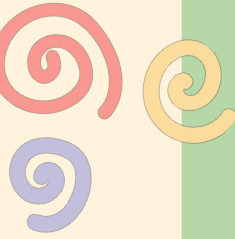

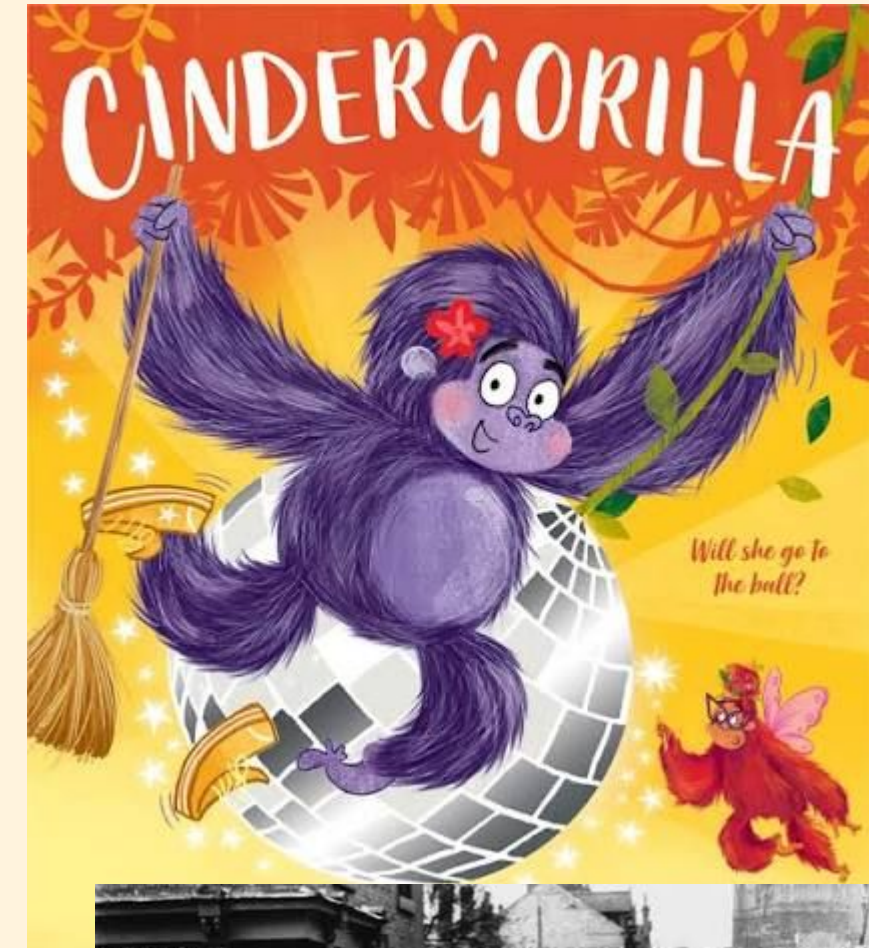

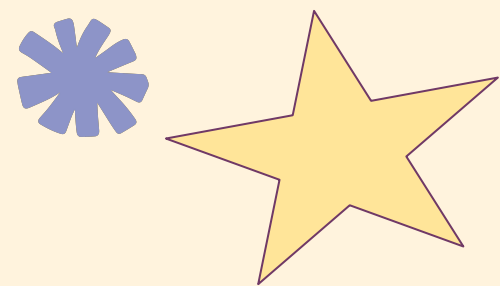

Year 1

This week in English we began reading our new text '*Cindergorilla*'. We made predictions and have really enjoyed getting to know our new main character.

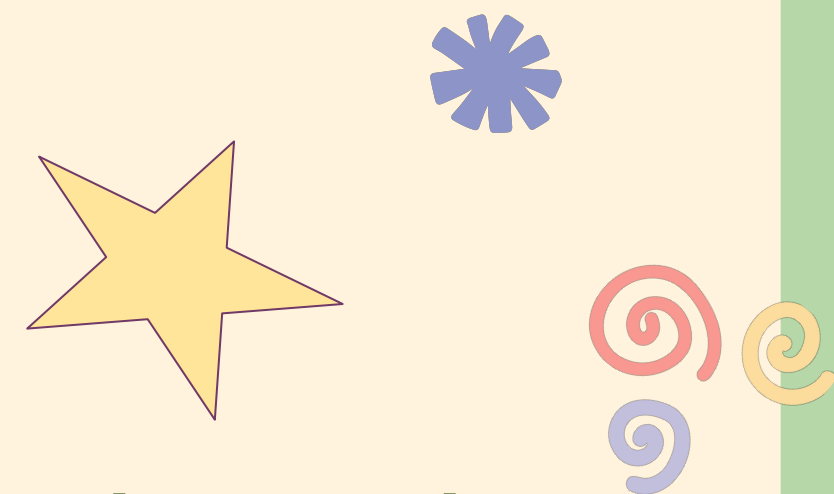

In maths we have begun learning all about addition and subtraction.

In history this week we have learnt what childhood was like in the past. We were very surprised to learn that children in the 1960's did not have ipads!

Year 2

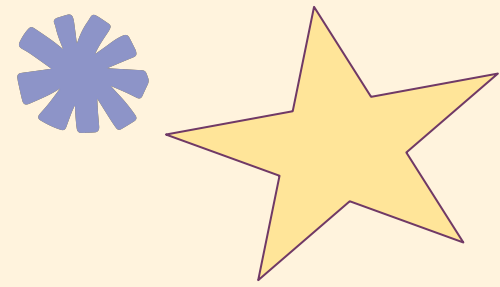

In maths, we have been using number tracks and number lines to order numbers up to 100.

In English, we have been using adjectives to describe nouns. We have described the mean giant and brave Jack. We will be using this knowledge to write our own character descriptions.

In science, we investigated how different materials may change shape by twisting, squashing, stretching and bending. We then decided if a material was elastic or flexible.

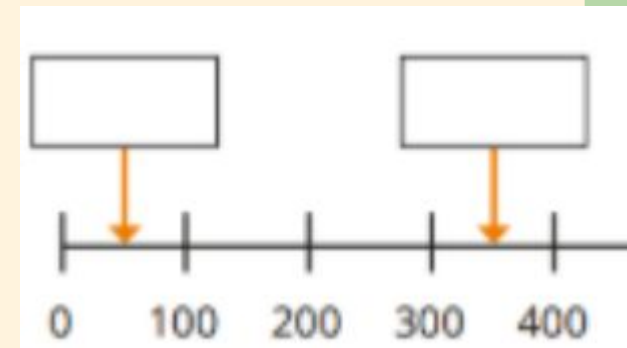

Year 3

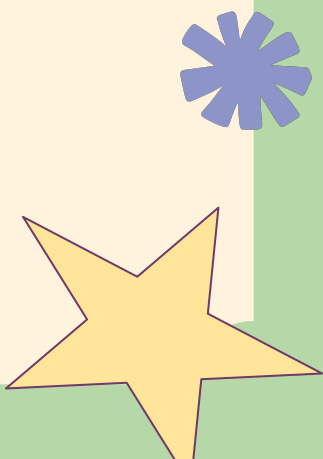

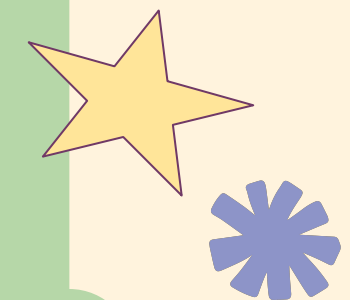

This week in year 3, whilst reading the story 'Ruby's Worry' in PSHEE, we have made our very own 'calm jar' as a method to help us if we feel worried.

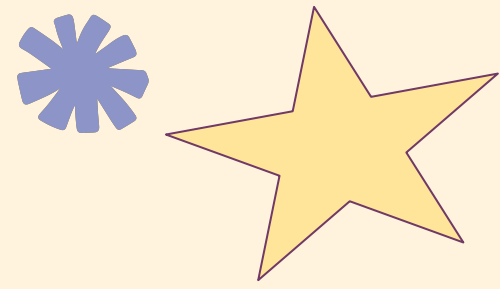

In maths we have been estimating to 1000 on a numberline.

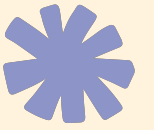

In writing we have consolidated using question marks.

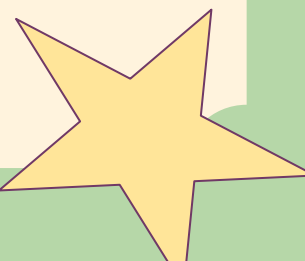

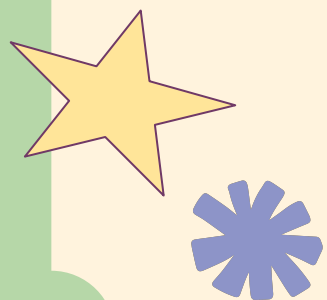

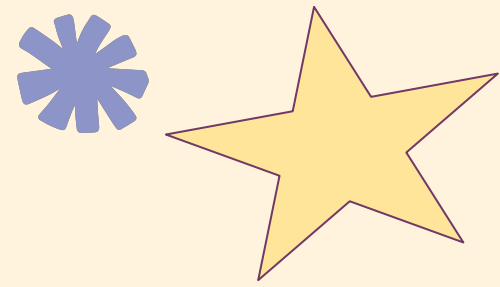

Year 4

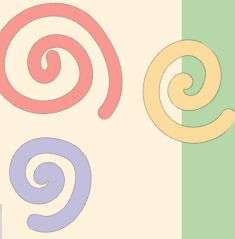

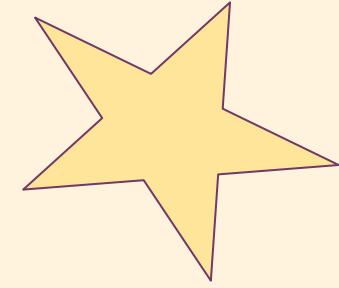

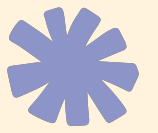

In Year 4, we have been writing character descriptions about an ogre. We have been coming up with adjectives to portray how revolting he really is!

In maths we have been doing '10, 100 and 1000 more and less'

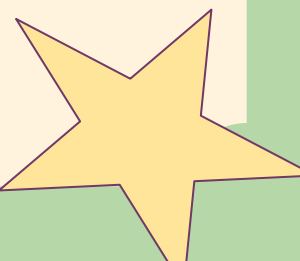

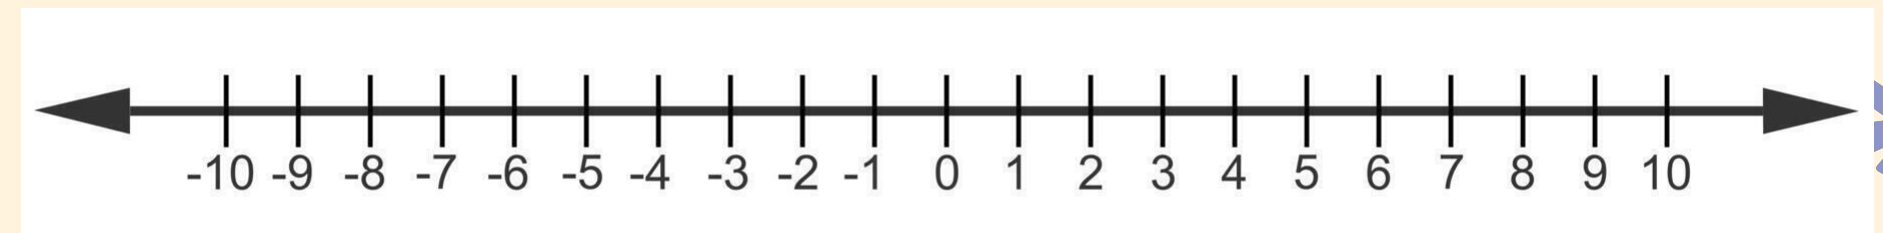

Year 5

In year 5, we have been planning our explanation writing. The purpose of our writing is to inform our community about the school food bank and encourage donations.

In maths, we have been learning to compare and order negative numbers on a number line and find the difference between two numbers, including negative numbers.

*★Year 6

This week year 6 have finalised their enquiry questions, ready for our trip to St Ives on Monday.

In maths we have moved onto addition and subtraction. We have focused on the vocabulary used in reasoning questions to help workout which equation we need to use.

*★ In writing we have edited and finalised our letter. We have acted as a parent of refugee children looking to move to a safe country.

Thank You
